IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) An information processing apparatus comprising:

generating means for generating one or more PlayList files specifying a sequence of reproducing [[an]] information recorded on a recording medium, and generating a management information file supervising said one or more PlayList files; and

recording means for recording said one or more PlayList files and said management information file, on said recording medium;

said management information file containing a resume PlayList file name ~~information[[;]]~~ ~~which~~ that indicates a name of a particular PlayList file ~~at a time point of completion of playback which is based on said particular PlayList file~~ whose playback has been terminated; and

said particular PlayList file containing [[a]] temporal information on [[said]] a time point of ~~completion~~ the termination of the playback of the particular PlayList file.

2. (Currently Amended) An information processing method comprising:

a step of generating one or more PlayList files specifying a sequence of reproducing [[an]] information recorded on a recording medium, and generating a management information file supervising said one or more PlayList files; and

a step of recording said one or more PlayList files and said management information file on said recording medium;

said management information file containing a resume PlayList file name ~~information; which~~ that indicates a name of a particular PlayList file ~~at a time point of completion of playback which is based on said particular PlayList file~~ whose playback has been terminated; and

said particular PlayList file containing [[a]] temporal information on [[the]] a time

point of ~~completion~~ the termination of ~~reproduction which is based on said playback~~

~~designation information~~ the playback of the particular PlayList file.

3. (Currently Amended) A recording medium having recorded thereon a computer-

readable program that when executed by a processor causes the processor to perform steps

comprising:

a generating step of generating one or more PlayList files specifying a sequence of

reproducing [[an]] information recorded on a recording medium, and generating a

management information file supervising said one or more PlayList files; and

a recording step of recording said one more PlayList files and said management

information file on said recording medium;

said management information file containing a resume PlayList file name

~~information; which~~ that indicates a name of a particular PlayList file ~~at a time point of~~

~~completion of playback which is based on said particular PlayList file~~ whose playback has

been terminated; and

said particular PlayList file containing [[a]] temporal information on [[the]] a time

point of ~~completion~~ the termination of ~~reproduction which is based on said playback~~

~~designation information~~ the playback of the particular PlayList file.

4. (Canceled)

5. (Currently Amended) An information processing apparatus comprising:

a playback mechanism configured to reproduce main information from a recording

medium having recorded thereon one or more PlayList files specifying a playback sequence

of said main information and a management information file supervising said one or more

PlayList files[[,]]; and

control means for controlling a playback of the main information on said recording

medium based on said management information file containing a resume PlayList file name

information which that indicates a name of a particular PlayList file at a time point of

completion of playback which is based on said particular PlayList file whose playback has

been terminated, said particular PlayList file containing [[a]] temporal information on said

time point of completion the termination of the playback of the particular PlayList file.

6. (Currently Amended) An information processing method comprising:

reproducing a main information from a recording medium having recorded thereon

one or more PlayList files specifying a playback sequence of said main information and a

management information file supervising said one or more PlayList files said method

comprising; and

a control step of controlling a playback of the main information on said recording

medium based on said management information file containing a resume PlayList file name

information which that indicates a name of a particular PlayList file at a time point of

completion of playback which is based on said particular PlayList file, and performed in

accordance with said whose playback has been terminated, and on said particular PlayList file

containing [[a]] temporal information on [[said]] a time point of completion the termination

of the playback of the particular PlayList file.

7. (Currently Amended) A recording medium having recorded thereon a computer-

readable program that when executed by a processor causes the processor to performs a

method comprising:

reproducing a main information from a recording medium having recorded thereon one or more PlayList files specifying a playback sequence of said main information and a management information file supervising said one or more PlayList files ~~said method comprising~~; and

a control step of controlling a playback of the main information on said recording medium based on said management information file containing a resume PlayList file name ~~information which~~ that indicates a name of a particular PlayList file ~~at a time point of completion of playback which is based on said particular PlayList file, and performed in accordance with said, and on said~~ whose playback has been terminated, said particular PlayList file containing [[a]] temporal information on [[said]] a time point of ~~completion~~ the termination of the playback of the particular PlayList file.

8-23. (Canceled)
